C/C++ Backend and Mobile Developer (m/f)

DACS Laboratories GmbH develops highly-scaling cutting-edge software distribution technologies with unprecedented performance. Our products are tailored to a broad spectrum of markets ranging from the video game industry to high-performance computing centers or large data centers.

Following our vision to provide transparent and easy-to-use solutions for the user, complex problems must be solved underneath and presented in intuitive interfaces. For that reason, we are looking for an experienced developer with focus on backend programming, user interface design and a profound knowledge in mobile app development. As part of a dynamic team, you will work in the core of our Gemmantics framework as well as the open-source SxAccelerate project.

What we offer:
- Team of 10 experienced people.
- Well-funded and awarded startup.
- Challenging development projects of high-performance cutting-edge technologies.
- Travel opportunities to conferences and partners around the world.
- Quiet and yet central environment near Düsseldorf.
- Family-friendly company.
- Above-average salaries for above-average results.

What you will work on:
- Help porting relevant parts of our frameworks Gemmantics framework as well as the open-source SxAccelerate to mobile architectures.
- Develop new storage models for mobile platforms.
- Design and implement new cross-platform user interface concepts.

You should have:
- Proven background in cutting-edge app development on mobile architectures (Android, iOS).
- Deep understanding of mobile devices as well as their memory and communication layers.
- Experience in developing cross-platform user interface (Windows, MacOS X, Linux).
- Experiences in development of web-based applications.
- Fluent English language skills.

If you want to join us, please send your CV or your LinkedIn/Xing profile to info@dacs-labs.com. Please attach source code snippets of previous projects or include your GitHub profile, too.

We are looking forward to meeting you.
